

PUNATURE FOOD INGREDIENTS CO., LTD

Room 202, No. 15, Lane 978 Jindu Road, 201108 Shanghai, China

TECHNICAL DATA SHEET

MICROBIAL RENNET GRANULAR 1500IMCU/G

Introduction: Microbial rennet is a milk-clotting enzyme suitable for application in cheese-making factories. It is controlled fermented by the purified fungus *Rhizomucor miehei*, no pathogens and purified preparation of Microbial Rennet, which can be used for the production of cheese and casein, and replace rennet from animal origin.

Specification: Meet the GB/T 1886.174 -2016 (enzymes for food industry)

Appearance	brownish granular	Total plate count	≤10,000 CFU/g
Loss on drying	≤8.0%	Yeasts and moulds	≤10 CFU/g
Clotting activity	≥1500IMCU/g	Coliform bacteria	<10 CFU/g
Lead (Pb)	≤5 ppm	Staphylococcus aureus	Negative in 1g
Arsenic (As)	≤3 ppm	Salmonella spp.	Negative in 25g
Mercury (Hg)	≤0.5 ppm	Listeria monocytogenes	Negative in 25g
Cadmium (Cd)	≤0.5 ppm	E. coli	Negative in 25g

Characteristics: Microbial Rennet Granular 1500IMCU/g is a little bit salty, good stability, soluble to water; barely soluble to ethanol, chloroform or ethyl ether. It shows a clotting performance very similar to a corresponding type of calf rennet. Enzyme activity is affected by processing conditions, milk composition, calcium concentration and pH.

Microbial Rennet is particularly suitable for making cheeses for vegetarians.

For more specific information about applications and dosage, please contact us.

Composition: Microbial rennet from *Rhizomucor miehei*, sodium chloride, sodium benzoate.

Packaging: 500g polyethylene bottle.

Shelf life and storage: 2 years when stored in a cool, dry place between 4-8°C, away from sunlight.
